CLIENT: WALLS CONSTRUCTION

LEAN CONSTRUCTION IMPLEMENTATION

Walls Construction is a privately owned company established over 70 years and is one of Ireland's leading building contractors which has a proven track record in a diverse range of sectors including residential, commercial, healthcare, education, industrial, retail, conservation and tourism/leisure. To continuously improve their business Walls decided to start their Lean Journey with the support and guidance of **Quality Positive** to become a **Lean Construction Company**.

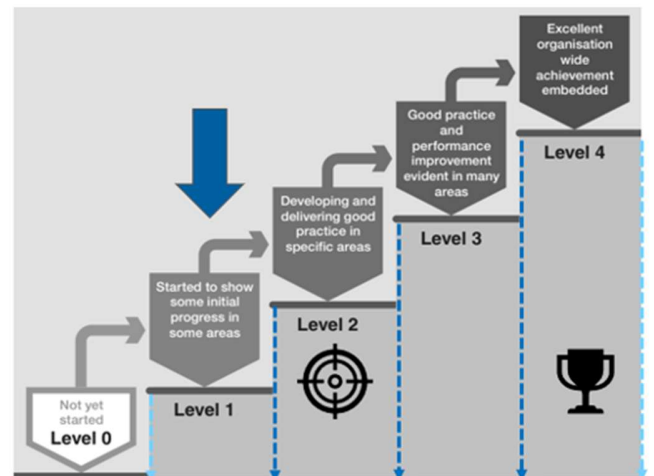

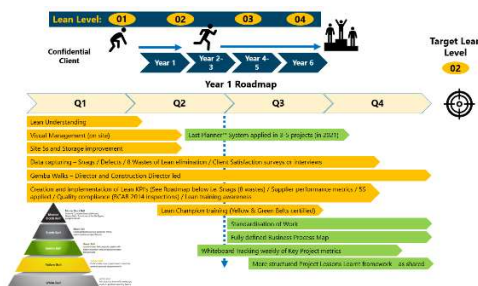

Walls understand that the lean approach provides the foundation for operational excellence by standardizing processes, instilling a culture of continuous improvement, focusing on connected Flow, stable processes, capability building and empowering workers on the shop floor.

QUALITY POSITIVE APPROACH

The successful Quality Positive approach is particularly designed for each client and take into account the individuality and any special organisation's requirements since every implementation is singular and every company has its own culture, and inheritance policies and systems, which will either support or delay the "lean" journey.

As Lean Specialists, Quality Positive creates for Walls Construction a 4 stages Lean Roadmap (From stage 0 - Lean Maturity assessment to Continuous improvement) as a Framework to guide building a foundation that consistently yields company-wide improvements, structure, and successfully implement the Lean Journey to each Client.

Quality Positive evaluate Walls actual Maturity stage and set short- and long-term goals for the Business (Roadmap) since the main Quality Positive objective is to help our clients to reach sustainable results and became a Lean Construction Organisation.

“Quality Positive creates a strategic Lean Roadmap to successfully start and implement the Lean Journey into Walls Construction Culture & Projects. Remember: Lean is not a set of Tools, Lean is a Mindset”
