AUDIT

Founded in 1998, CJK is recognised as a leading provider of complex electrical contracting services within the construction industry and Industrial, Pharmaceutical, Commercial and Healthcare Sectors. CJK embrace new technology through BIM, LEAN Construction and off-site fabrication and are highly proficient in the installation of MV, LV and ELV systems and controls.

To continuously improve their business CJK engaged with Quality Positive to conduct site audits and inspections to provide guidance and ensure Quality Assurance Quality Control and regulatory compliance with Building Regulations (BCAR).

**“Quality Positive’s robust audits, inspections and reporting process has generated detailed data, providing ‘real-time’ insights into our operational quality approaches. This helps facilitate further continuous improvements for CJK Engineering in our pursuit of Quality excellence.”**

Eamonn Thornton - CJK Operations  
director

## QUALITY POSITIVE APPROACH

To address these challenges Quality Positive complete multiple audits monthly for CJK to measure their current processes and activities, be it on or offsite, with recommendations for improvements provided. In addition, we conduct Building Regulation and Handover Documentation compliance reviews, during the construction stage (not at the end), to support final System Completion and Handover.

Quality Positive delivery services:

- Site Quality inspections
- Snag List and Non conformance report
- System inspection
- ITP -Inspection and Test Plan
- Commissioning Test Pack
- Final Handover documentatation advise
- Gap analysis

### Client Testimony

**“Quality Positive has performed several inspections for our projects, which facilitates continuous improvements for CJK Engineering. We are always very pleased with their support services, inputs and advice. ”**

**Eamonn Thornton – Operations Director, CJK**
